

BACKHOE

BK KUBOTA BACKHOE

BK 久保田后挖掘机

It's a machine ideal for digging irrigation trenches, breaking up rocky soil, piping preparation, channeling rainfall runoffs and roadsides, planting and relocating trees.

Uses :

- To clean up constructions areas by moving large plies of dirt from one place to another regardless of terrain
- To dig the ground
- To smooth out uneven terrain with the use of the digging bucket
- To create trenches
- To carve ditches or dikes
- To remove deep-seated roots of trees

Features :

- Suits all types of tractors with Cat 1 or 2,3-point linkage kit;
- Joystick style control console
- Tough and reliable hydraulic arm
- Individually controlled support legs
- Boom lockout pins for transport
- With 12" Bucket

Optional :

- Hydraulic system (PTO gearbox & PTO pump & oil tank)
- 2. 14", 16", 18" bucket

Model	BK-6N	BK-7.5N
Digging Depth	73.9"(1877MM)	90.2"(2219MM)
Swing Angle	180°	180°
Loading Height	65.0"(1651MM)	75.5"(1918MM)
Working Length	98.1"(2492MM)	116.5"(2959MM)
Transport Height	70.7"(1796MM)	79.8"(2027MM)
Bucket Width	12"	12"
Bucket Rotation	180°	180°
Leg Spread	59.0" (1498MM)	59.0" (1498MM)
Structure Weight	396kg	425kg
Tractor HP	20-30hp	20-40hp
