

# POTATO MACHINE

## 1JH-110 POTATO STRAW CRUSHING MACHINE

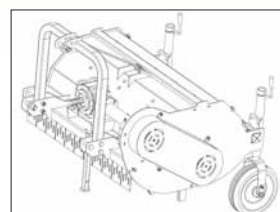

### 1JH-110 型马铃薯杀秧机

#### Uses

Potato straw killing machine uses before harvesting process. It cuts and crushes not only potato straws but also seedlings at the bottom of row verge. All straws and seedlings are cleanup and returned to field at once without hurting potato fruit.

#### Working principal

The flail blade runs at a speed of 2150rpm and leads to negative pressure, which sucs up and crush the seedlings at the bottom of row verge

Model	1JH-110
Structure Size	120x115x95 cm
Structure Weight	215 kg
Tractor Power	20-35 hp
Working Width	110 cm
Row Number	1
Blade Shaft Speed	2150 rpm
Working Capacity(Hectare/Hour)	0.34
