

# POTATO MACHINE

## 4U83 POTATO HARVESTER

### 4U83 型马铃薯收获机

4U83 is a machine with reliable feature and high working efficiency. It is perfect for harvesting root products like potato, garlic, sweet potato, carrot and peanut.

#### Features

- High efficiency
- Low breakage rate
- Smooth running without vibration
- No grass blocking
- No clod leakage
- Long service life
- Adopting anti-grass-winding function, settled winding grass and clog problems. Capable of harvesting with seedling.
- Perfect for weedy area
- Adapted soil type: Sandy Soil, Sandy Loam, Clay soil
- Forced vibration system, good separation effect, high flexibility
- Potato exposing rate ( $\geq 99.5\%$ ), breakage rate ( $\leq 1\%$ )
- The residual agricultural film can be extracted so as not to affect the next crop's growth.
- Rubberorcasted and long-life rear driving wheel

Model	4U83
Structure Sizes	1450x1150x900mm
Structure Weight	230kg
Attachment Method	3-Point Hitch
Tractor Power	20-35HP
Working Depth	20-30
Harvesting Width	83
Row Spacing	90-120cm
PTO Speed	540
Working Capacity(Hectare/Hour)	0.24
Potato Exposing Rate (%)	( $\geq 99.5\%$ )
Breakage Rate (%)	( $\leq 1\%$ )
